Rigoletto

No composer that ever lived, not even Beethoven or Wagner, underwent a more remarkable development in his artistic ideals, in his views as to the aims and methods of his art, or in his growth of power to realize them, than Verdi. In his long life of eighty-eight years he saw a complete change in the whole system of dramatic music, a change to which his ceaseless activity and ever-expanding genius conformed themselves. And while it would be going too far to rank him with the reformers who led in the accomplishment of this revolution.

15950

he contributed to it by the enormous popularity of his work, as he himself advanced toward the ripe perfection of his art, flowering in "Aida," "Otello" and "Falstaff." And so, since the activities of all productive artists must be analyzed and classified, the critics have separated Verdi's life-work into periods, and have found in "Rigoletto" the starting-point of a second stage of his artistic development. In this he is considered to have marked a notable advance upon his earlier works, represented at their best in "Ernani," which, according to Dr. Hanslick, were but his contributions to the mass of carnival operas that are annually produced by the score for the season in Italy, and are then speedily forgotten even in their native land, having seldom been heard of beyond its borders. "Rigoletto," with "Il Trovatore" and "La Traviata," which immediately followed it, represents a higher ambition, a striving for a more serious and substantial place in the world of music. These three works raised him at once to a position of the highest popularity throughout the whole of Europe; they put him, in fact, into a place beside Rossini, Bellini and Donizetti, whose voices were at this time all silenced, as the undisputed head of the Italian school of opera. In 1851, when "Rigoletto" was produced, he was thirty-eight years old; and from then till his death, fifty years later, his career was one of steadily advancing triumph.

The new romanticism of Victor Hugo, which then held the literary world captive, offered a rich field for operatic exploitation, and it was eagerly entered. In 1844, Verdi had selected Hugo's "Hernani" for operatic treatment, and had made a brilliant success with it; and saw now in the French dramatist's play, "Le Roi s'amuse," another subject for effective musical treatment. These subjects were not appropriated thus, however, without vigorous protest from Victor Hugo, who, when "Ernani" and "Rigoletto," respectively, were brought to Paris, did all in his power to prevent the public production of what he considered a literary mutilation of his work. In the case of "Ernani" he compelled a modification of the action, a change in the names and condition of the characters; and the collaborators were even prepared to consent to a change of title. Many similar alterations had already been made in the libretto drawn from "Le Roi s'amuse;" but Hugo went still further in opposition to its Paris production, entering an action against the manager in the courts, in which, however, he was signally defeated. Librettists in the first half of the last century were a harried fraternity. It was a time of revolution and unrest, and the police of all the Continental countries were determined that nothing should be shown upon the stage that might in the least fan the flame. The experiences of Verdi and his librettists with this censorship make amusing reading at this distance, though doubtless they brought much perplexity in their train at the time. The turbulent spirits of Italy, chafing under the Austrian yoke, were kept under especially strict surveillance in the opera houses by the dominant power. "Rigoletto" fared as half a dozen of Verdi's other operas fared.

18059

The opera was arranged for as the *opera d'obbligo* of the carnival season at La Fenice, the great opera house of Venice. Verdi himself had chosen the subject of "Le Roi s'amuse" for the piece, as he chose all his subjects, and intrusted its execution to Francesco Maria Piave, his hack librettist at this period, who had written a number of his previous librettos. Piave had carried out his task, and had put upon the book, as agreed with Verdi, the title of "La Maledizione." But having learned wisdom from experience, he took it to the police censor before he delivered it to the composer. It would not do at all. The frailties of royalty were altogether too drastically exploited, in the misdeeds of Francis I., in Hugo's play and in the libretto, and the production of such a piece was promptly forbidden. Piave was for writing another at once, to fulfill the contract with La Fenice. Verdi would listen to nothing of the sort. It must be "La Maledizione" or nothing. The proceedings seemed to be at a standstill, till help arrived from a quarter whence none was expected. The local commissary of police was a music lover and an admirer of Verdi. He wanted to hear the new opera. He suggested that the king, Francis I., be made into the insignificant ruler of a petty state; and since the title must also be changed—at this day it is difficult to see why—it had better be taken from the hero's name. Verdi agreed to these and a few other minor suggestions that wrought no injury to the dramatic substance of the piece. He set off for his home in Busseto, possessed of a veritable *furor scribendi*, and in forty days returned to Venice with the music complete.

The story, as it was finally accepted, is this: The licentious Duke of Mantua—who, as we have seen, represents Francis I. in Hugo's play—has among his followers a privileged buffoon, Rigoletto—the Triboulet of "Le Roi s'amuse"—a shapeless, deformed creature, whose moral nature is as evil as his physical aspect, except for his devoted love of his daughter Gilda. Her he keeps concealed and jealously guarded from the intrigues of the court. One of his functions is to act as pander to his master in his misdeeds; and he has assisted the Duke in the seduction of the wife of Count Ceprano, the daughter of Count Monterone (Hugo's St. Villiers). The first act opens upon a festal entertainment in the hall of the ducal palace, crowded with cavaliers and ladies. The Duke appears and sings the ballata, "Questa o quella," establishing at once his moral standing. He is plotting with Rigoletto to get rid of Ceprano; the cynical brutality of the buffoon's insults disgusts the assemblage of courtiers, who desire to be avenged upon him. Monterone enters, to demand satisfaction for his daughter's dishonor. He is taunted and mocked by Rigoletto, and as he is being dragged away by the Duke's orders, turns to the buffoon and curses him with a father's deep and terrible malediction. The second scene shows a deserted street at night, with Rigoletto before his own cottage—which adjoins the high wall surrounding Count Ceprano's palace—recalling with dread the curse that has been laid upon him. He enters the courtyard and meets his

18969

daughter Gilda, who lives here in retirement while he visits her secretly by night. These visits having come to the knowledge of the court, it is assumed that he has a mistress. Closely as she has been concealed, however, she has not escaped the notice and attentions of the Duke, who, in the guise of a poor student, has won her affections, and even as her father is leaving her, comes again to make love to her. He, too, leaves her—singing with her the duet "Addio, speranza ed anima"—and the scene is then invaded by a crowd of courtiers armed and masked. They are determined to avenge themselves upon Rigoletto for his taunting insolence in the court, by stealing his supposed mistress, Gilda, his daughter. Pretending that it is Count Ceprano's wife whom they intend to abduct from the adjoining palace, they enlist Rigoletto's aid. Having masked and blindfolded him, instead of scaling the wall as they pretend to do, they enter his own cottage and carry off Gilda to the Duke's palace. Rigoletto, too late, tearing off his bandage, recognizes his daughter's scarf that has been dropped, and faints in horror at the realization of what has happened, recalling again the curse that has been laid upon him.

The second act shows an apartment in the Duke's palace, where the Duke is bewailing the loss of Gilda, whom he has again sought at her home, and in vain. The conspirators enter, and change his laments to rejoicings by recounting their exploit at Rigoletto's cottage. Rigoletto himself then comes in upon them, affecting indifference, but finally bursts into a passionate appeal for the restoration of his daughter. She emerges from an inner apartment and tells him of her undoing; and when he vows to be revenged, Gilda, still loving her betrayer, pleads that he be forgiven.

The third act opens on a deserted spot on the shores of the river Mincio, outside the town of Mantua, with a rustic inn in the foreground. It is night. There come Rigoletto and Gilda, the former intent upon his revenge, for which he has arranged with the innkeeper, Sparafucile, an assassin who is ready to murder for money, "one-half before the deed is done, the rest when he is dead." He has a beautiful sister, Maddalena, who acts as his decoy, and who has attracted the amorous notice of the Duke. He comes this night, disguised as a cavalry officer, to make love to her, singing the aria "La donna è mobile," while Sparafucile prepares to kill him; but Maddalena herself is fascinated with the handsome stranger, and determines to save him. In the meantime Rigoletto and Gilda are outside, watching, the one gloating over his approaching revenge, the other bewailing her betrayal. The situation is musically interpreted by the famous quartet, "Un dì, se ben rammentomi," remarkable for its combination into one musical whole of the different expressions of the four characters: the amorous pleading of the Duke, the coquetry of Maddalena, the despair of Gilda, the baleful savagery of Rigoletto. Rigoletto sends his daughter home to disguise herself as a youth and take horse to escape to Verona, while he himself makes the final arrangements with Sparafucile for the Duke's murder. The

18060

Duke retires to sleep, and as Sparafucile reënters the house, he is again besought by Maddalena to spare the life of the intended victim. The assassin finally promises that if any other man shall enter the inn before midnight, he shall be sacrificed instead, to secure the money from Rigoletto. In the mean while, Gilda, having disguised herself as her father directed, returns to the inn in time to overhear Sparafucile's promise, and with a woman's devotion resolves to yield her life to save the Duke, her false lover. It is storming, and the thunder and lightning increase in fury. She demands admission; and there in the darkness, as she enters, is struck down. Then comes Rigoletto to see the fulfillment of his revenge. Sparafucile drags him out a sack, which Rigoletto is to throw into the river as containing the body of his enemy. But just at this moment of his triumph he hears the Duke's voice, from the floor above, carolling "La donna è mobile." He tears open the sack, and there in the lurid glare of the lightning flashes he sees, instead of his enemy's, Gilda's body. He realizes that the father's curse upon him has been fulfilled, and falls senseless upon his daughter's corpse. So ends one of the grisliest horrors that has ever been set to music for the operatic stage.

The opera made an instant success in Venice and throughout the Italian opera houses, and the melody of "La donna è mobile" was soon upon the lips of everybody. A story of this air has often been told, and is thus related by Mr. Streatfield in his "Masters of Italian Music:"

When the rôles were distributed, the tenor who was to play the Duke found a blank in his part at the beginning of the third act. He went to Verdi and asked what it meant. "Don't be in a hurry," said the *maestro*, "there is plenty of time." Every day it was the same story; the tenor petitioned in vain for his missing song. At last, the day before the final rehearsal, Verdi gave him the manuscript of the famous "La donna è mobile," but not before he had made him promise not to sing or whistle a note of it to a living soul. At the rehearsal every one was laid under a solemn oath not to divulge a note of the music before the performance. Verdi knew the quickness of Venetian ears. He knew that if the melody of the song were once heard outside the walls of the theatre, it would be all over Venice in a few hours, and at the performance the gilt would be off the ginger-bread. The secret was well kept, and the *canzone* was the success of the evening; but on the way home every one was humming the air, and by the next day it was the common property of every *gamin* in Venice.

"Rigoletto" was produced in London as soon as arrangements could be made for it, being heard at the Covent Garden Theatre in the season of 1853, for the first time, on May 15. The cast included Mario as the Duke, Ronconi as Rigoletto, Tagliafico as Sparafucile, Mme. Bosio as Gilda, and Mlle. Didiée as Maddalena. It was by no means warmly received by the press. The music was considered to be full of plagiarisms, lacking in ideas, "puerile" and "queer" in its modulations, and the opera was declared to possess no qualities that would ensure it a long life.

15069

Somewhat similar judgment was passed upon it in New York. Its first performance here was on February 19, 1855, at the Academy of Music, where Ole Bull made it the opening attraction of a brief and ill-starred venture in operatic management. Max Maretzek was the conductor, and the cast was as follows:

Duke of Mantua, ...	Signori Beagio Bolcioni
Rigoletto, ...	Ettore Barilli
Sparafucile, ...	Luigi Rocco
Gilda, ...	Signore Bertucca Maretzek
Maddalena, ...	Patti Strakosch

Yet in both cities it has had a long lease of life. "Rigoletto" did not reach Paris till 1857; it was produced there at the Théâtre Italien on January 19 of that year. The cast included Mmes. Frezzolini and Alboni and Signori Mario and Corsi. The first French performance was of a translation by Edouard Duprez at the Théâtre Lyrique, given on December 24, 1863, with Mlle. de Maësen as Gilda, Mlle. Dubois as Maddalena, M. Montjauze as the Duke, M. Ismaël as Rigoletto, and M. Wartel as Sparafucile. The Italian version had already established its success—the first that Verdi had ever scored in the French capital; and the opera in its French translation has ever since retained a firm hold upon the Parisian musical public—firmer, indeed, and with promise of longer continuance, than it can show in either London or New York.

Nº 6. "Quel vecchio maledivami!,,

Duet.

The end of a deserted street. At the left side a house of humble appearance, with a small courtyard surrounded by a wall. In the courtyard there is a high tree, and a garden-seat; in the wall, a door leading to the street; above the wall, a practicable terrace, supported by arches. A door from the first floor opens upon the terrace, to which there is also a staircase at the front, On the right side, a very high wall; and an angle of the Ceprano palace is visible. It is night.

Act II.

An anti-chamber in the ducal palace; two side-doors, and large folding doors at the back, which are shut. On each side of the folding doors hangs a large portrait; on the left, that of the Duke, on the right, that of his Duchess. There is an armchair beside a table covered with velvet, and other furniture.

End of Act II.

Act III.

A lonely spot on the shores of the Mincio On the left, a two-story house almost in ruins, the front of which, open to the spectator, shows a rustic inn on the ground floor· a broken staircase leads from this to a loft where stands a rough couch. On the side towards the street is a door, and a low wall extends backward from the house. The Mincio is seen in the background, behind a ruined parapet; beyond, the towers of Mantua. Night. Gilda and Rigoletto, in great agitation, on the road. Sparafucile in the house, seated by a table polishing his belt, unconscious of what is spoken outside.

Nº 19. "Della vendetta alfin giunge l'istante!„

Recitative.

Rigoletto alone, closely wrapped in his mantle, comes forward from the back of the stage. The violence of the storm gradually abates. There are still a few flashes of lightning, and thunder in the distance.
